

DAGS

DEPLOYMENT AI GOVERNANCE STANDARD

DAGS v1.0 Normative Standard

Non-Substitution Rules

1. Purpose

This document defines the non-substitution rules governing interpretation and application of the Deployment AI Governance Standard (DAGS) v1.0.

Its purpose is to:

- Prevent replacement of DAGS requirements with external artifacts
- Eliminate proxy, equivalence, or “covered elsewhere” claims
- Preserve the autonomy and integrity of the normative standard
- Ensure governance obligations are met explicitly, not indirectly

This document is normative.

2. Principle of Non-Substitution

Each DAGS requirement shall be satisfied directly.

No requirement may be considered met by implication, proxy, analogy, or assumed equivalence.

Where DAGS specifies a requirement, that requirement stands on its own authority.

3. Framework and Standard Substitution Prohibited

The following substitutions are explicitly prohibited:

- Treating compliance with another framework as satisfaction of DAGS
- Claiming ISO, NIST, SOC, or similar alignment as a substitute
- Importing controls from other standards in place of DAGS requirements

Mapping does not constitute substitution.

4. Tool and Platform Substitution Prohibited

The following substitutions are prohibited:

- Asserting that use of a specific platform or vendor satisfies DAGS
- Treating tooling features as governance controls without documentation
- Relying on automated systems in lieu of assigned accountability

Tools may support governance but do not replace it.

5. Policy and Documentation Substitution Prohibited

The following substitutions are prohibited:

- Policies substituted for operational controls
- Documentation substituted for enforceable authority
- Statements of principle substituted for defined constraints

Documentation must demonstrate governance, not merely describe intent.

DAGS

DEPLOYMENT AI GOVERNANCE STANDARD

6. Organizational Structure Substitution Prohibited

The following are prohibited:

- Organizational hierarchy substituted for system ownership
- Committees substituted for accountable roles
- Corporate governance substituted for system-level governance

Governance must be system-specific and explicit.

7. Assessment Artifact Substitution Prohibited

The following substitutions are prohibited:

- Assessments substituted for controls
- Scores substituted for evidence
- Diagnostics substituted for normative compliance

Assessment artifacts are derivative and non-authoritative.

8. Partial Substitution Prohibited

Partial substitution is prohibited.

A requirement is either satisfied as written or not satisfied.

DAGS

DEPLOYMENT AI GOVERNANCE STANDARD

Mitigating factors, compensating controls, or “functional equivalents” are not permitted unless explicitly defined in the normative text.

9. Burden of Demonstration

The burden of demonstrating non-substituted compliance rests with the organization asserting alignment.

Ambiguity shall be resolved against substitution.

10. Authority

This document governs determination of whether a requirement has been improperly substituted.

In the event of dispute, these rules are controlling.

11. Status

This Non-Substitution Rules document is **normative**.

It is binding for DAGS v1.0 and all derivative artifacts unless explicitly superseded.

12. License & Authority

The Deployment AI Governance Standard (DAGS) is a publicly available governance standard made available for reference and implementation.

All intellectual property rights in DAGS, including the standard text, structure, methodology, and interpretive guidance, are retained by the DAGS Governing Body.

Public availability of this document does not grant any license or right to use DAGS for commercial, advisory, certification, assurance, or assessment purposes.

Such uses may require separate authorization or licensing from the DAGS Governing Body.

No rights are granted by implication, estoppel, or public distribution.

Editorial, interpretive, versioning, and equivalency authority is retained exclusively by the DAGS Governing Body. No third party may issue authoritative interpretations, certifications, or compliance determinations without explicit written authorization.
